Section 1

Why learn stata?

Excel vs Stata

Can I use Excel?

The main reasons to use Stata

- In Excel you make changes directly to the data and save new versions of the data set
- In Stata you make changes to the instructions on how to get from the raw data to the final analysis and save new versions of the instructions
- Since Stata is a more statistics oriented software, processing the data to create analytical products can be a lot easier.
